

Injection into ESR

singleturn injection of a single bunch (length < 500 ns) from SIS

entire SIS intensity can be transferred to ESR

large ring acceptance allows beam accumulation by stacking

acceptance for injected beam

$$\epsilon_x = 10 \pi \text{ mm mrad}, \Delta p/p = \pm 3 \text{ ‰}$$

ring acceptance

$$\epsilon_x = 250 \pi \text{ mm mrad} \text{ (} \Delta p/p = 0 \text{)}$$

$$\Delta p/p = \pm 2 \text{ ‰} \text{ (} \epsilon_x = 0 \text{)}$$
